

Functional Tester

Job Description

About Sogeti

Part of the Capgemini Group, Sogeti operates in more than 100 locations globally. Working closely with clients and partners to take full advantage of the opportunities of technology, Sogeti combines agility and speed of implementation to tailor innovative future-focused solutions in Digital Assurance and Testing, Cloud and Cybersecurity, all fueled by AI and automation. With its hands-on 'value in the making' approach and passion for technology, Sogeti helps organizations implement their digital journeys at speed.

Capgemini is a global leader in partnering with companies to transform and manage their business by harnessing the power of technology. The Group is guided everyday by its purpose of unleashing human energy through technology for an inclusive and sustainable future. It is a responsible and diverse organization of over 325,000 team members more than 50 countries. With its strong 55-year heritage and deep industry expertise, Capgemini is trusted by its clients to address the entire breadth of their business needs, from strategy and design to operations, fueled by the fast evolving and innovative world of cloud, data, AI, connectivity, software, digital engineering and platforms. The Group reported in 2021 global revenues of €18 billion.

At Sogeti, we know how to create value with technology- it's our passion. We work closely with clients and partners to take full advantage of the opportunities of technology.

We mobilize expert teams that create custom solutions from existing and emerging technology. Our value is in our approach, characterized by the speed with which we deliver specialist solutions in digital assurance and testing, data & analytics and digital & development.

Our Mission: We embrace the value of diversity within Sogeti and the entrepreneurial spirit of our people. If you're looking to join a company with a proven track record of success and that deeply values its people and their continuous learning and development, Sogeti Ireland offers the opportunity for you to grow and advance.

Your Mission

- Review user stories / requirements, functional design specifications and project documentation.
- Identify, create and prioritise Test cases
- Define and prepare test data.
- Execute test criteria and interpret results.
- Use of Test management and Issue tracking tools e.g. JIRA, Zephyr, ALM
- Peer review Test cases/scripts from other team members.
- Support business users during UAT testing.
- Report test status to Test Lead
- Testing of API, Web Services, Databases and SQL, reports and Batch jobs.

Your Profile

- Holder of ISTQB certification or equivalent
- Proficient in the English language
- Awareness of Agile concepts
- Strong interpersonal skills
- Excellent written and verbal communication skills
- Effective at working to strict deadlines and managing a wide variety of tasks
- Ability to work proactively and independently to deliver high quality and on time
- Able to quickly learn and adapt to new environments, projects and teams

Data Analyst Job Description

We are looking for individuals with the ability to interpret data and turn it into information, to impact a company's decision-making process positively. In this role, you collect, analyse, and store data; using it to help our clients and our company.

You will be joining a fast-growing team of consultants and data specialists to bring technology solutions to our clients.

Responsibilities

As a Data Analyst you are responsible for:

- Collecting, interpreting, and analysing data
- Reporting the results to relevant stakeholders
- Finding trends and patterns in information
- Working with colleagues and clients to establish business requirements
- Creating more efficient data collection and analysis processes.
- Producing and tracking key performance indicators (KPIs).
- Creating data graphs, dashboards, and visualisations.
- Conducting surveys and analysing their results.

Expertise Required

We are looking for the following skills, which we believe are essential:

- Outstanding analytical and numerical skills
- Detailed knowledge of data analysis tools
- The ability to conduct data quality control, linkage, and validation
- An aptitude for providing clear data visualisations and graphs
- Experience of XML, APIs, SQL, Python, PowerBI, Tableau and SAS
- Experience of data analysis techniques and statistical methodologies
- Great communication and stakeholder management skills to present your findings in a concise, relevant and compelling way
- Excellent team-working skills

Qualifications

- You will require bachelor's degree in Mathematics, Statistics, Economics, or Computer Science.
- A Postgraduate qualification for example: Master of Science (MSc) in Data Analytics would be advantageous.
